Project Details: -

Title Of The Project: "ELECTRIC VEHICLES (Advanced Battery Management System for High-Performance of Electric Vehicles)."

Role: Team Member

Description:

Worked on a project that introduces an advanced battery management system (BMS) to enhance the performance and lifespan of EV batteries by integrating solar energy and grid power. It addresses critical challenges such as DC faults, voltage instability, and thermal stress through adaptive power distribution and predictive maintenance. Advanced BMS solutions also incorporate predictive algorithms and thermal management to enhance safety and energy efficiency. Making them indispensable for modern EVs.
